

MAGIC BREED PLUS

Magic Breed has been the trusted name for breeders and horse lovers for over 30 years.

The new Magic Breed PLUS system builds on Magic Breed's reputation for reliability and ease of use and adds new features including an informative display, longer range and improved battery life.

Minimise loss of sleep and long hours of supervision around foaling time. The non-invasive transmitter attaches to the halter and detects when the mare has laid in a foaling position.

The Magic Breed Plus system is also useful for detecting colic and for monitoring horses after major surgery.

24 month warranty.

Range exceeding 1km possible (500m is easily achieved in built-up areas).

Transmitter can last an entire season on one pair of AAA batteries. The user will be alerted when the transmitter battery is almost empty.

8x

Up to 8 transmitters can be identified by a single receiver.

Supplied in protective storage case

Designed and manufactured in Australia by EE Solutions
